EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey

B.S. in Computer Science and Technology

Guadalajara, MX

August 2022 – Present

- **Expected Graduation Date:** June 2026

EXPERIENCE

Software Engineer Intern

July 2025 – Present

Oracle

Remote

- Contributed to frontend development for Oracle Analytics Cloud and AI Data Platform, building and maintaining enterprise-scale components using TypeScript and Java.
- Implemented automated end-to-end tests with Selenium, improving test reliability and reducing regression issues during deployment cycles.
- Collaborated with senior engineers in agile workflows, code reviews, CI/CD pipelines, and software development lifecycle practices.

Application Developer Intern

September 2024 – May 2025

IBM

Guadalajara, MX

- Contributed to the development of EngageAR, IBM's flagship financial platform, focusing on improving system scalability and performance.
- Improved load times up to 60% by implementing virtualization and lazy loading methods across different microservices.
- Provided an opportunity to learn about scalable systems, UI/UX and microservices.

PROJECTS

Biocrownny | *Python, Odoo, AWS*

January – March 2026

- Led the end-to-end development of a custom Odoo module using Python for a cleaning products company, driving system architecture decisions and guiding implementation across the team.
- Integrated AI services, including Gemini and OpenAI APIs, to summarize and deliver key business data, improving accessibility and enabling faster decision-making.
- Built and implemented business intelligence features and data visualizations, helping employees analyze data and make informed decisions.

Oracle Task Management System | *React, OCI, Springboot*

February – June 2025

- Enhanced project management efficiency by implementing Story Points and estimation accuracy tracking, supporting measurable sprint and task reporting for over 50 team tasks per sprint.
- Automated and expanded backend testing, increasing test coverage of core task logic to over 90%, and reduced manual test effort by 50% through robust JUnit test suites.
- Improved user experience and workflow reliability, contributing to multiple modules (Java, TypeScript, Shell, Docker) and optimizing deployment scripts to achieve 100% successful CI/CD pipeline runs for new releases.

Punto Donativo | *Flutter, Flask*

September – December 2024

- Led the development of an app focused on helping people manage their food waste in order to help Mexico's biggest foodbank.
- Integrated a real-time database to streamline food donation tracking and ensure accurate and efficient inventory management for the food bank.
- Designed a user-friendly interface using Flutter to encourage engagement, making it easier for users to report surplus food and schedule donations.

SKILLS

Languages: Python, C++, Java, Typescript, JavaScript, HTML/CSS, SQL

Frameworks: NextJS, React, React Native, Flask, Springboot, Oracle JET

Developer Tools: Neovim, Git, Heroku, VSCode, Visual Studio, PyCharm, IntelliJ IDEA, Github Codespaces, SQLite, AWS, Google Cloud, Vercel, Figma, MySQL, MongoDB, Oracle Analytics,
